OUR CAREER ASSESSMENT PROCESS

CAREER ASSESSMENT TEST

Interpretation of Career Assessment Report is interpreted based on three sections

CAREER INTEREST

Career interest test is basically a process for discovering / learning about one's like, dislike, interest, relating to a particular activity / thing or a job title. Which is then interpreted into his/her career interest

Example: If a child likes playing outdoor games more than the indoor games, then it can be interpreted that a child may have an interest in making a career as a footballer, cricketer etc.

APTITUDE TEST

Aptitude is an innate or for learning. An aptitude test is taken to determine a person's ability in a particular skill or field of studies. This test is divided into seven parts which it measures seven different abilities of a person such mathematical, verbal, mechanical etc. Often, the discovery of potential leads to the development of new interests.

No prior knowledge is assumed, as the tests seek to determine innate ability at a particular competency.

PERSONALITY TEST

Although you behave in different ways, depending upon the Circumstances you are in or the people you are with, you nevertheless have a personality that remains identifiable. If this were not true, people would not be able to anticipate your reactions; the very fact that there are aspects of you which are predictable testifies to your personality.

This is not to say that your personality will never change. It may well do so, especially if you make efforts to become aware of your potential and give yourself experiences which are developing.

OUR CAREER ASSESSMENT APPROACH:-

We follow a top to bottom approach

Step 1:
Shortlist suitable career title . Job interviewer, computer programmer, marketing executive, etc.

Step 2
Device a . to pursue a Job, internship, degree, course, in order to get into that particular career.

Step 3
Which College, University, entrance exam, study abroad/, to choose.

**CAREER
INTEREST
TEST**

CAREER INTEREST

Career interest test is basically a process of discovering / learning about one's like, dislike, interest, knowledge etc relating to a particular activity / thing or a job title. Which is then is interpreted into his/her career interest .

Example: If a child likes playing outdoor games more than the indoor games, then it can be interpreted that a child may have interest in making a career as a footballer, cricketer etc.

CAREER INTEREST TEST SCORE

YOUR CAREER INTEREST RESULT SHOWS AVERAGE INTEREST IN

Finance & Management Research

Creative-words

Your score is: **LOW**

A person with a high score in this career interest may have enjoyed english or other 'wordy' subjects, such as history, at school. Their aim is to use words creatively or are drawn towards careers which in some way involve them with information and communication. More structured and predictable careers arise in journalism or public relations. There are other careers which are often suited to this area of preference, such as legal work and librarianship.

Finance & Management

Your score is: **AVERAGE**

People falling under this category generally like to work with people and ideas more than things. They Likes to lead and persuade people. They like to sell, manage, and influence. They generally avoid activities that require careful observation and scientific, analytical thinking. they are generally described as outgoing, optimistic, energetic, ambitious, and sociable Examples: Salesperson, lawyer, Paralegal/Legal Assistant, politician, accountant, business owner, executive or manager, travel agent, music or sports promoter etc.

Social

Your score is: **LOW**

A social person generally like to work with people more than things. Likes to do things to help people -- like, teaching, nursing, or giving first aid, providing information; generally avoids using machines, tools, or animals to achieve a goal. They like helping people and solving their problems. Example: Teacher, nurse, coach, counselor, fitness trainer, police officer, social worker, salesperson, customer service officer, waiter, secretary etc.

Administrative

Your score is: **LOW**

People under this career interest generally like to work with papers, numbers, records, or machines in a set, orderly way; generally avoids ambiguous, unstructured activities. They prefer working indoors and at tasks that involve organizing and being accurate, following procedures, working with data or numbers, planning work and events. They are typically described as practical, careful, orderly and persistent.

Creative (Arts & Design)

Your score is: **LOW**

High score in this category indicates a person is imaginative and spontaneous. They have talent in one or more art forms. They are usually described as an open, Creative, independent, emotional, impulsive and original. Likes to do creative activities like art, drama, crafts, dance, music, or creative writing; generally avoids highly ordered or repetitive activities. Examples: Actor, illustrator, photographer, songwriter, singer, instrument player, Choreographer, writer, editor, hairdresser, fashion designer, Art Director, Graphic Designer, Animator, etc

Physical

Your score is:

LOW

A person showing interest in this area, prefers concrete tasks. They generally prefer to work with things than with people. People under this category likes to work mainly with hands, making, fixing, assembling or building things, using and operating equipment, tools or machines. Often likes to work outdoors. They like to make things. They like to work alone. They have wonderful manual and mechanical skills. Examples:- Engineer, Pilot, farmer, horticulturist, Medical Technician, armed services personnel, mechanic, Landscape architect, electrician, computer technologist, sportsperson etc.

Research

Your score is:

AVERAGE

People falling under this category likes to work with abstract ideas and concepts more than with people or things. They like to discover and research ideas, observe, investigate and experiment, ask questions and solve problems. They are good at math & science and they have good observation skills. They really prefer to work independently.

PERSONALITY TEST

PERSONALITY

Although you behave in different ways, depending upon the Circumstances you are in or the people you are with, you never - The less have a personality that remains identifiable. If this were not true, people would not be able to anticipate your reactions; the very fact that there are aspects of you which are predictable testifies to your personality. This is not to say that your personality will never change. It may well do so, especially if you make efforts to become aware of your potential and give yourself experiences which are developing. However, it seems practical to take your personality as it is now in order to see how it may relate more successfully to one career than another.

PERSONALITY TEST SCORE

Introvert/ Extrovert

Your score is:

LOW

A LOW SCORE MEANS, YOU ARE INTROVERT : -People who falls under this personality trait are likely be very specific and firm in their way of doing things. -They like working alone and avoid comprises of viewpoints. -These people are also likely to be reserved, detached and aloof in their day to day life. - This kind of personality is useful for jobs that require people to work in isolation or within a specific routine.

Imaginative/ Realistic

Your score is:

LOW

A LOW SCORE MEANS, YOU ARE IMAGINATIVE : Imaginative people are usually absorbed in thought, oblivious to particular people and physical realities. -Their individuality may cause them to get rejected in group activities. - Even though they come across as unconventional and unconcerned over every day matters, but they do possess positive traits like being self- aware, self- motivated, highly creative and concerned with "essential" rather than getting engrossed in unnecessary matters.

Calculative/ Enthusiastic

Your score is:

LOW

A LOW SCORE MEANS, YOU ARE CALCULATIVE : -People under this personality traits are stable, calm, composed and take things as they come. -They have an inner desire to do a task in the most efficient and organised manner. -They may sometimes appear dull or unresponsive in situations where quick response is required. - Jobs like actuary, civil Engineer, metallurgist etc falls under this trait where a hardworking, careful and reliable person in required to perform these jobs.

Submissive/ Dominant

Your score is:

LOW

A LOW SCORE MEANS, YOU ARE SUBMISSIVE : -They tend to keep matters to themselves, giving way rather than arguing. -Easy to get along with. Often good team players. Accommodating and not easily annoyed. -May avoid saying what is on their mind. Avoid confrontation. -Try hard to please. Cooperative, respectful and helpful."

APTITUDE TEST

APTITUDE

"Aptitude" is something very important especially for students who are trying to enter corporate world or going to write any competitive exams. I Personally Feel "Aptitude is not Knowledge or Skills that one has learned over the years, it's a 'natural talent' that someone posses." However, it can be explored and developed within by us and that can be achieved by understanding and practicing the concepts of aptitude. (Please refer to page no. 13 to read "Tips to improve Aptitude") An individual with good aptitude skills are considered better than others because they are fast at their mind and good at problem solving skills. Thus aptitude has become the most important soft skills these days.

APTITUDE TEST SCORE

YOUR APTITUDE RESULT SHOWS HIGH INTEREST IN

Mathematical Ability Test (15-16 years age) | Conceptual Reasoning Test (15-16 years age) | Mechanical Reasoning Test (15-16 years age)

YOUR APTITUDE RESULT SHOWS AVERAGE INTEREST IN

Logical Thinking Test (15-16 years age) | Visual Skills Test (15-16 years age) | Speed & Accuracy Test (15-16 years age)

Mathematical Ability Test (15-16 years age)

Your score is:

HIGH

This test contains questions that test your knowledge of percentages, ratios, number sequences, data interpretation. Numerical Reasoning is important for succeeding in careers such as mathematics, physics, chemistry, engineering, etc. The ability to reason with numbers is also important in many occupations like bookkeeping, laboratory work, carpentry and tool making.

Conceptual Reasoning Test (15-16 years age)

Your score is:

HIGH

It is a non-verbal way of testing your reasoning ability. It tests how well an individual can reason with geometrical patterns or design. This type of conceptual reasoning is important in courses and occupations that requires the ability to see relations among objects in terms of their size, position, shape, and quantity. Examples include fields as computer programming, car repair, drafting and mathematics.

Mechanical Reasoning Test (15-16 years age)

Your score is:

HIGH

It measures the ability to interpret the basic mechanical principles of machinery tools and motion. Each item consists of pictorially presented mechanical situation and simply worded question. Items require reasoning rather than special knowledge. Those who do well in this test usually find it easy to learn how to repair and operate complex devices.

Verbal Ability Test (15-16 years Age)

Your score is:

HIGH

Verbal ability tests tell us how well a student can understand and work with meaning, information and interpret from the given text. This aptitude is useful in areas of work where words are used in analysis and in precision of communication. Literary careers would demand this aptitude, as would education, legal work, business, journalism and some areas of sciences.

Logical Thinking Test (15-16 years age)

Your score is:

AVERAGE

Logical reasoning test includes broad categories questions ranging from time distance, seating arrangement, blood relation etc. This aptitude test which measure a person's problem solving ability. Logical ability is useful in many careers but particularly required in careers that need significant problem solving ability or higher use of logic. Careers under this includes Anthropologist, Business Consultant, Career Advisor, Forensic Psychologist, Doctor of Medicine etc.

Visual Skills Test (15-16 years age)

Your score is:

AVERAGE

This test requires you to hold an object in your mind, while also turning it upside down, around and pulling it out of shape. The ability to do this is associated with success in the area of design, where a sense of shape and form would obviously be required. Occupations in which an individual is required to imagine how an object would look if made from a given pattern include art, clothing design, dentistry, drafting, carpentry and architecture.

Speed & Accuracy Test (15-16 years age)

Your score is:

AVERAGE

This is a test to see how quickly you can compare number combinations. The test items do not call for reasoning skills, rather the emphasis is on speed. Good score in this test may indicate success in certain careers like technical, scientific data and Routine clerical tasks such as filing or coding.

Writing Skills Test (15-16 years age)

Your score is:

HIGH

This test measures the students ability to find errors in grammar, capitalization, punctuation. The ability to spell is the very basic skill required for many academic and vocational careers. High score in this test implies a possible success in careers like teaching and writing.

MULTIPLE INTELLIGENCE TEST

MULTIPLE INTELLIGENCE

Multiple Intelligence is used to test the behavior of an individual.

MULTIPLE INTELLIGENCE TEST SCORE

Linguistic Intelligence

Your score is:

LOW

You are low in Linguistic Intelligence, which is a part of Howard Gardner's multiple intelligence theory that deals with sensitivity to the spoken and written language, ability to learn languages, and capacity to use language to accomplish certain goals. People with linguistic intelligence, such as William Shakespeare and Oprah Winfrey, have an ability to analyze information and create products involving oral and written language such as speeches, books, and memos. Potential Career Choices Careers you could dominate with your linguistic intelligence: Lawyer Speaker / Host Author Journalist Curator

Musical Intelligence

Your score is:

LOW

You are low in Musical intelligence, which refers to the skill in the performance, composition, and appreciation of musical patterns. People with musical intelligence, such as Beethoven and Ed Sheeran, have an ability to recognize and create musical pitch, rhythm, timbre, and tone. Potential Career Choices Careers you could dominate with your musical intelligence: Singer Composer DJ Musician

Logical-Mathematical Intelligence

Your score is:

BELOW AVERAGE

You are below average in Linguistic Intelligence, which refers to the capacity to analyze problems logically, carry out mathematical operations, and investigate issues scientifically. People with logical-mathematical intelligence, such as Albert Einstein and Bill Gates, have an ability to develop equations and proofs, make calculations, and solve abstract problems. Potential Career Choices Careers you could dominate with your logical-mathematical intelligence: Mathematician Accountant Statistician Scientist Computer Analyst

Bodily-kinesthetic Intelligence

Your score is:

BELOW AVERAGE

You are below average in Bodily kinesthetic intelligence, which is the potential of using one's whole body or parts of the body (like the hand or the mouth) to solve problems or to fashion products. People with bodily-kinesthetic intelligence, such as Michael Jordan and Simone Biles, have an ability to use one's own body to create products, perform skills, or solve problems through mind-body union. Potential Career Choices Careers you could dominate with your bodily-kinesthetic intelligence: Dancer Athlete Surgeon Mechanic Carpenter Physical Therapist

Interpersonal Intelligence

Your score is:

LOW

You are low in Interpersonal Intelligence, which is the capacity to understand the intentions, motivations, and desires of other people and consequently to work effectively with others. People with interpersonal intelligence, such as Mahatma Gandhi and Mother Teresa, have an ability to recognize and understand other people's moods, desires, motivations, and intentions. Potential Career Choices Careers you could dominate with your interpersonal intelligence: Teacher Psychologist Manager Salespeople Public Relations

Intrapersonal Intelligence

Your score is:

BELOW AVERAGE

You are below average in Intrapersonal intelligence, which is the capacity to understand oneself, to have an effective working model of oneself-including own's desires, fears, and capacities—and to use such information effectively in regulating one's own life. People with intrapersonal intelligence, such as Aristotle and Maya Angelou, have an ability to recognize and understand his or her own moods, desires, motivations, and intentions. This type of intelligence can help a person to understand which life goals are important and how to achieve them. Potential Career Choices Careers you could dominate with your intrapersonal intelligence: Therapist Psychologist Counselor Entrepreneur Clergy

Spatial Visual Intelligence

Your score is:

LOW

You are low in Spatial intelligence, which features the potential to recognize and manipulate the patterns of wide space (those used, for instance, by navigators and pilots) as well as the patterns of more confined areas, such as those of importance to sculptors, surgeons, chess players, graphic artists, or architects. People with spatial intelligence, such as Frank Lloyd Wright and Amelia Earhart, have an ability to recognize and manipulate large-scale and fine-grained spatial images. Potential Career Choices Careers you could dominate with your spatial intelligence: Pilot Surgeon Architect Graphic Artist Interior Decorator

Careers based on **MULTIPLE INTELLIGENCE**

+918454828821, +917208028821, +919579427143 allegiance.educare@gmail.com

Usually students at an early age of 19 (or could be any age group) might show multiple interest level in the Career Interest Test Result since many careers at this age still remain to be explored by them. They can meet different people from different careers and ask about their work, read about different careers Online / Newspaper / Career magazines & books or watch videos on the internet about different careers.

The first list of Strongly Recommended Careers below is based on your Career Interest, Personality, Aptitude & Multiple Intelligence Test Interpretation.

Interest of an Individual can change as time passes by and he/she is exposed to more Careers in the future. On the other hand it is highly debated by psychologists that the Personality of an Individual is extremely difficult to change, unless he/she makes enormous effort to change it. Every Career requires a certain kind of personality, for eg. A Lawyer needs to have a Factual Personality, while an Artist needs to have an imaginative personality. Imaginative & Factual are completely opposite Personalities. So, a Lawyer will find his profession more suitable with a Factual Personality.

The second list of Average Recommended Careers below is based on your Career Interest, Personality, Aptitude & Multiple Intelligence Test Interpretation.

Aptitude is the capability of an Individual to perform in a Career, hence it is the most important factor while choosing a career. For eg. A Mathematician should have a high score in Numerical Ability to succeed as a successful Mathematician.

Strongly Recommended Careers

Ecologist

AVERAGE RECOMMENDED CAREERS

Astronomer	Audiology Expert	Bacteriologist	Biologist
Botanist	Chemical Lab Expert	Chemical Technologist	Clerk

Automobile Expert		Caution (Your Interest, Personality and Aptitude all three are not a match)
Chief Executive Officer		Can go (Your Aptitude is a match, but Interest and Personality are not)
IT Expert		Caution (Your Interest, Personality and Aptitude all three are not a match)

The Age from 13 yrs to 19 yrs is called the Adolescence. In this phase you might experience physical and psychological changes, which might sometimes lead to self discovery, anger, mood swing.

FOLLOWING ARE SOME TIPS WHICH MIGHT HELP :

Eat Right & Exercise : This will keep you physically and mentally fit and relieve stress.

Take up a Hobby like playing an instrument, photography, etc

Get atleast 7-9 hrs of sleep

If you' feel stressed, do not hesitate to talk to your parents.

Talk to your parents to establish boundaries & rules

Keep yourself in good company.

Parents also need to understand few things, so please ask your parents to watch this video : [Click Here](#)

1) UNDERSTAND WHAT CONCENTRATION IS

"Concentration is taking your mind off many things and putting it on one thing at a time."

2) DECIDE WHAT YOU WANT TO CONCENTRATE ON

In many ways, you become what you focus on — that is, you take on some of its characteristics. Have you ever noticed how couples who have been married for many years start to look like each other, or how people often come to resemble their pets, their cars, their hobbies, or their work projects?

3) WATCH OTHER PEOPLE CONCENTRATING

Go see a good action movie. In the middle of it, look around at the people in the theater. What are they doing? They are absolutely still, eyes barely blinking, and their breath is slower. It would take a really major distraction to break their attention stream. These physical signs may give you a hint about ways to increase your own concentration abilities.

4) AVOID CONSTANT SENSORY INPUT

Multi-tasking (trying to do more than one thing at a time), loud noises, and visual stimulation (such as from a T.V.) make concentration much more difficult, and being around them or doing them too much can put you into a habit of non-attention which can be hard to break.

5) MAKE IT A POINT TO PUT YOUR FULL CONCENTRATION ON WHATEVER YOU ARE DOING

Don't let anything distract you. It really helps to be in a quiet place, but you can learn to block out noise if necessary.

6) STAY CALM

Deep concentration is a matter of increasing or directing your life-force or conscious, cosmic energy. The more of this kind of energy you have, the better. Scattered energy doesn't help. It must be calm, focused energy. Learn to be calmly concentrated and be concentratedly calm.

7) LEARN TECHNIQUES TO INCREASE AND CONTROL YOUR ENERGY:

One such technique is Paramhansa Yogananda's Energization Exercises. Controlling your energy is an important first step toward the ability to concentrate deeply.

8) TAKE BREAKS

Go outside and breathe deeply or take a brisk walk. Make yourself do this often and you'll be able to return to your task recharged and ready to focus more creatively.

9) LEARN TO MEDITATE

Meditation is the most powerful of all concentration enhancement techniques. Learn a few simple meditation techniques and practice them at least five minutes daily.

10) WHILE MEDITATING, WATCH YOUR BREATH

Don't control it in any way, just observe. This teaches you to focus your mind on one thing at a time. As you observe your breath, it will slow down, along with your mind (this is a scientifically well-documented), and you move into a dynamic, peaceful (but not sleepy) state of being. Your mind will become recharged and creatively receptive.
